

Safety made simple.

Easier solutions from Banner.

Two-piece light screens. The easiest to set up with simplified alignment, diagnostics and maintenance.

Fiber optic interlocks and light screens.

Eliminate switch wiring for simplified guarding of doors, openings and hazardous areas.

Safety modules. Category 2 and Category 4 modules monitor E-stop and interlock contacts. Simple design and documentation.

Interlock switches. For all types of guard doors and covers. Positive opening contacts meet International standards.

E-stop push buttons. Mechanical, twist-to-release emergency stop buttons are easy to install.

Two-hand controls. Requires simultaneous use of both hands, meeting EN 574 standards.

The help you need. We help apply our safety solutions with dozens of in-house applications engineers and more than 3,000 technical sales engineers world-wide. Banner is always close by to help you apply the correct safety products.
