

A whole new way of looking at things.

The first
touch screen
image sensor puts
powerful inspection
capabilities at your fingertips.

iVu series^{TG}

The **iVu series^{TG} Image Sensor** combines the simplicity of a photoelectric sensor and the intelligence of a vision sensor, delivering powerful and affordable inspection capabilities to solve a wide range of complex applications:

- Label alignment inspection
- Date/lot code inspection
- Blister pack inspection
- Stamped hole inspection
- Part presence and orientation
- Packaging verification
- Vial cap inspection
- Injection molding verification

No PC required to configure, change or monitor. The built-in touch screen provides easy configuration and monitoring right on the sensor.

First-time users can have iVu up and running in minutes, without training.

In four easy steps! Install and connect the sensor, select the sensor type, acquire a good image and set the inspection parameters. Menu-driven tools guide you through every configuration step.

40-plus years of sensor design experience, quality control, sales support and cost-effective solutions:

- Banner quality products with global availability
- Rapid customization with most products shipping in 3 days or less
- Industry's largest force of application engineers to solve your toughest challenges
- More than 3,000 factory and local field representatives to serve you.
